## Education

Lagos State University

Oct 2017 – Mar 2023 (5y 5m)

Bachelor of Science (2.1) Chemical Engineering

## Snippets

Banking @ [www.sycamore.ng](http://www.sycamore.ng)

Utilized efficient communication platforms like Zoom to work with cross-functional teams to deliver projects on time and within budget. I aggressively sought input from two senior developers to better my skills, and I effectively put their recommendations into practice. Created responsive web applications using front-end code employing HTML, CSS, JavaScript, and jQuery that work on desktop, tablets, and more than 20 different devices. I helped with the creation and upkeep of front-end web applications, which had a positive effect on the performance of the organization as a whole.

Lagos State University– Final Year Project

created a responsive website with exceptional cross-browser compatibility and runtime efficiency using cutting-edge JavaScript web technologies. These websites' goal is to determine, regardless of moisture content, how long it will take a mashed cassava to fry at a certain time.

## More about me

I like to work with people who...

enjoy working with colleagues who drive me forward. When I see that other people try their best in work, it motivates me to also push hard. I also embrace diversity in the workplace.

Right now I'm learning...

Learning Node.js, SQL, and PHP as my backend in order to become a full-stack developer.

The coolest side project I've built is...

I became fixated on interpreters in my final year of engineering. So I made the decision to write my own JavaScript code. The amazing thing about that project was that it differ from other programs.

Interests

Reading, Basketball, Tennis, Cooking.
